

AET Flexiblespace (I) Pvt. Ltd.

Technology to sustain a greener earth

Proficiency in Raised Floor Environment

The most critical factor faced by us in our work space is flexibility to adapt to changes which are driven by technological evolution and accordingly design our workspaces to forestall obsolescence. In fact, today the greatest challenge in space management is to make work spaces aesthetic, efficient and flexible or to sum it, make it ergonomic

Raised Access Floor Systems in conjunction with Underfloor Air Distribution is the key to flexibility in our workspaces today as the space underneath can facilitate enough room for existing and future add on utilities as and when required by the organization, in view of ever changing work flow and employee / technology related needs.

Besides Raised Access Floor Systems we also offer you complete **Underfloor Air & Power Distribution Solutions / Trading & Control Room Furniture** which are designed to **Save Energy** and come with cutting edge technology which helps you to achieve tremendous flexibility with your workspace by integrating the HVAC, access floor technologies, Bus bar based power tracks, desk modules for raw & stabilized power.

We also provide Data Clean Services (Controlled Environment Cleaning) and Airflow Management Services,
